

# COVID-19 Exposure Tracing Program

## Stubbe Nurse Contact Tracing Benefits

Identifying Exposed Contacts to minimize interaction is critical to protection against further spread.

Notifying all individuals helps ensure contacts isolate to prevent further spread of the virus.

Contact Investigation in congregate living settings, processing & manufacturing environments, and individual households is a business and financial priority.

## CONTACT TRACING Offerings

Stubbe & Associates' experienced COVID-19 Clinical Resource Team is available to assist your employees who have tested positive for the virus and to help identify other employees who may have been exposed - either at work, due to shared transportation, or congregate living.

- Telephonic Contact Tracing for known positive cases, to minimize risk of outbreak among other co-workers.
- Triage support and clinical expertise for Human Resources, Safety Managers and Occupational Health.
- Ongoing monitoring and assessment, to limit the spread of COVID-19
- Adaptable program, with flexibility to meet your organization's needs
- Bilingual Service available upon request
